Welcome to Greater China and Mongolia CCNA NetRiders

The technical content of the competition is geared toward CCNA certifications. In addition, there will be some Internet of Everything and soft skills questions.

The Competition will be provided in English only and is open to students in China, Hong Kong, Macau, Mongolia and Taiwan.

China is offering 3 competition options (CCNA, CCENT and IT Essentials) in 2015. If your country is offering more than one level, the rules clearly state that you can only enroll in one level of competition. Even if you meet eligibility requirements for more than one, you must only register for one competition or you will be disqualified.

For official Rules and FAQs, click on the links below:

1 PRACTICE SITE

The Practice Exams in the Practice Site enable instructors and students to prepare for the NetRiders competitions by testing login, equipment, firewall, proxy settings, bandwidth, graphics viewing and Packet Tracer 8.1.1 or higher. It also will give you an example of all types of questions asked.

Instructors and Competitors should use this site to check for:

- Packet Tracer 8.1.1 Compatibility
- Site firewalls and proxy settings
- Bandwidth issues
- Image or graphic loading

The enrollment key for the Practice Site is [NetRiders](#)

Competition Outline

Practice Site for 2015 NetRiders competitions in Greater China and Mongolia

Cisco Networking Academy NetRiders are interactive student skills competitions. Our goal is to create a fun, educational challenge for CCNA Routing & Switching, CCNA Exploration, CCNA Discovery and IT Essentials students to compete against your peers in a real-time environment to showcase your IT/Networking skills.

Each region will offer a CCNA, CCENT and IT Essentials competition. Students may only compete in one competition in a given year so each student needs to carefully select the competition based on the eligibility requirements and the courses they are currently taking or have recently completed.

This is the Practice Site and not the actual competition page.

Please make sure you register for either the CCNA, CCENT or IT Essentials Competition during the registration dates for your region.

This is practice so the site is open 24/7.

3 CCNA Theoretical and Packet Tracer Activity Exam

We strongly recommend that you take this exam at least one time from the computer and location (testing Packet Tracer version for downloading and configuring PT files, Internet, bandwidth, image loading, and firewall settings) that you will use for the competition.

There is an example theoretical exam in which you will have 50 minutes to answer 80 questions.

And there is an example of a Packet Tracer Activity and Exam. You have 60 minutes to work through the activity and answer the questions on the exam. In the competition, the score the admins use to determine your ranking will come from the Packet Tracer exam questions only and not from the Packet Tracer activity.

No Internet research is allowed during the exam. (But OK for the Practice site)

You get 5 attempts.

For this Practice Site, it is very important that you test downloading the PT files, opening and configuring them in the most current version of Packet Tracer. You must use Packet Tracer 6.1.1 or higher.

点击这里进入笔试

八、頁面會有提示，點擊確定後，輸入 Password 進入答題頁面。(CCNA 輸入的 Password 會不一樣，輸入方法是一樣的。)

九、請注意左側為答題時間倒計時，題目分多頁顯示，請點擊“Page”後面的數字進行翻頁。

十、平臺會從開始答題自動倒計時，（這裡請各位老師提醒比賽學生要沒做完一頁要保存點擊“Save without submitting”；全部做完了才點擊“Submit all and finish”）。

“Save without submitting”為保存但不提交；

“Submit all and finish”為全部提交並結束，操作時需注意。
